

# You can get it flying

When we are thirsty we need to drink.  
However, by this time, we are already dehydrated.

We can be intellectually dehydrated too and it can reach a dangerous level long before we feel the thirst.

Our knowledge is lacking but we realise it only after it is too late.

Don't become mentally dehydrated.

If you have even the slightest thirst for knowledge – drink more than you think you'll need to quench it.

In fact I've got it now.
